

FACILITIES DEPARTMENT MEMORANDUM

NOTICE for PARENTS, GUARDIANS, STUDENTS. FACULTY and STAFF

From: Steve Zannino, Facilities Operations

Date: September 27, 2009

RE: Pest Management

For controlling insects, rodents and weeds, Milton Academy uses the least toxic products possible. We use chemicals (pesticides) only when necessary to eliminate a pest problem. Notice will be posted in the areas where applications will take place and they will be secured against access for the period specified; we will take into account all precautions found on the pesticide product label.

At this site you will find additional information regarding the Children's Protection Act, the Standard Written Notification and the Pesticide Information Profile (PIP).

If there are any additional questions or concerns please contact Robyn Bailey, Facilities Department, 617-898-2411, and she will connect you with the appropriate individual for a response.
